

Tram Grade Separation Projects

Morphett Road Level Crossing Removal Project

Works update

We've raised the tram line over Morphett Road to get traffic moving.

What's happening

Works are continuing on and around the new Morphett Road tram overpass and Anzac Highway intersection.

These works include:

- handrail installation on the Shared Use Path connecting the Mike Turtur Bikeway
- construction of the Pedestrian Actuated Crossing (PAC) on Morphett Road including new underground services, traffic lights, new kerbs, asphalt and fencing
- remaining intersection upgrade activities including final asphaltting works and permanent line marking
- finishing works on the new tram overpass.

These works are being undertaken at night to minimise impacts on road users, tram operations and passenger movements.

Landscaping, installation of artwork and other finishing works are continuing during the day.

Mike Turtur Bikeway opening

Works are progressing well to finalise the installation of the additional safety railing on the overpass and we remain on track to have this open late September 2026.

Hours of work

Day work – Monday to Sunday between 7am and 7pm

Night work - Sunday to Thursday between 8pm and 5am

Where

Along Morphett Road and Anzac Highway, Dunbar and Maxwell Terrace and surrounds.

How this affects you

During this time, intermittent road closures, speed and lane restrictions will be required. Roadside electronic signage will be in place to support safe vehicle movements.

You may experience periods of noise as we undertake certain activities, such as asphaltting works. We will do our best to minimise impacts wherever possible. You might also notice some odours, which is normal during asphalt work.

Changed traffic conditions – Morphett Road

Road users are reminded of the changed traffic conditions on Morphett Road south of the Anzac Highway intersection to facilitate construction of the new Pedestrian Actuated Crossing (PAC).

The new northbound through lane on Morphett Road is now open, with speed and lane restrictions in place around the work area in the new road median.

On site traffic signage and roadside electronic signage will be in place to support safe vehicle movements.

Local roads

To keep everyone safe, local side road closures and detours and intermittent speed and lane restrictions will continue. We will keep you up to date as we complete major construction in the coming months.

Please refer to the '[Morphett Road Level Crossing Removal Project Temporary Local Access Changes](#)' fact sheet available on the project website for more information.

We appreciate the community's patience as we progress towards the completion of this project in the coming months.

Stay up to date

Tram Grade Separation Projects

Morphett Road Level Crossing Removal Fact sheet -Temporary local access changes

Several temporary changes are required to local access and cyclist and pedestrian access during construction of the Morphett Road overpass in Morphettville. These changes are important to keep everyone safe.

Temporary local access changes

Maxwell Terrace near Morphett Road

From 2 August 2025 we need to close a section of Maxwell Terrace, between Morphett Road and Duggan Avenue. This closure is required until the project is complete.

Access to properties will be maintained throughout the works via the detour routes. We will provide advance notice if there is a need to temporarily restrict driveway access. Please see the map below for further details. Please follow directions from our traffic controllers.

Pedestrian and cyclist local access changes

From 1 August 2025, we need to close the Mike Turtur Bikeway, between Francis Avenue, Glengowrie and Park Terrace, Plympton Park until the project is complete.

We have developed a detour route in consultation with local cycling groups and council. Please see the map below for further details. For more information about pedestrian and cyclist detours between the City and Glenelg, please visit: tgsa.gov.au/news/current-pedestrian-and-cyclist-detours.
